FLEXOTILE[®] Tactile Indicators are designed to give warning of hazards in the continuous accessible path of travel and directional information to pedestrians who are blind or visually-impaired through contact by foot or cane with the ground surface. Tactile is a system of texturing the floor ground surface to assist pedestrians who are visually impaired to complete their journey with ease and confidence. These tiles provide guidance and help convey important information such as clues, directions or warnings. The raised surfaces and markers on these tiles can be detected by canes.

BENEFITS

- ▶ Attractive Architectural appearance.
- ▶ Complies with International Standards.
- ▶ Suitable for interior or exterior applications.
- ▶ Perfect for new residential & commercial buildings.
- ▶ Largest color range currently available in Pakistan.
- ▶ Can be installed on any floor/ surface with the help of proper adhesive material.
